

Photo Story Classroom Ideas

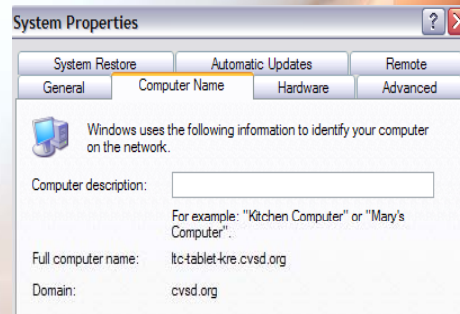

Day 2
Scott Krentel

Idea List

- Field Trips
- Reports
- Course [Descriptions](#)
- [Memories](#)
- Classroom Expectations
- Portfolio
- Science Experiments
- Time Line

Pushing Software

1. Email me your computer name, building and room number - (right click on **my computer** select **properties** click tab for **Computer Name**) and room number.
2. You will get an email conformation the software has been “pushed”

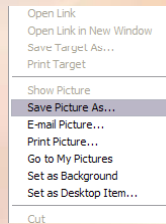

“Free” Music

- The music on the **Furl It** site is provided for you to refer to. Please be aware of your CVSD AUP and copyright law when using it. This is for home use.
- Go to Furl It and filter by topic “Music”
- Thanks to Emily Pospisil for compiling this list.

Primary Documents

- Primary Documents will bring your content alive for your class
- Go to Furl It and filter by topic “Primary Source”
- Found a Picture? Right click, select **save picture as** and navigate to your U drive

Create a Story from a Single Photo

1. Open Photo Story 3 for Windows. On the welcome page, click **Begin a new story**, and then click **Next**.
2. On the **Import and arrange your pictures** page, import the same picture three times, and position the three copies of the picture next to each other on the filmstrip.
3. To customize the motion for the first copy of the picture, on the **Narrate your pictures and customize motion** page, click the first copy of the picture on the filmstrip, and then click **Customize Motion**.

Create a Story from a Single Photo

1. On the **Motion and Duration** tab, complete the following tasks for the first picture:
2. Select the **Specify start and end position of motion** check box.
3. For the **Start position**, move the position rectangle to select the area where you want the motion for the first picture to begin.
4. To create a pure panning motion for the first copy of the picture, select the **Set end position to be the same as start position** check box. This option ensures that the rectangle for the start and end positions is the same size.

Create a Story from a Single Photo

1. For the **End position**, move the position rectangle to select the area of the picture where you want the motion for the first picture to end.
2. To save the motion for the first picture, click **Save**.

Create a Story from a Single Still Photo

- To set the motion for the second copy of the picture, click the **Next picture** arrow button at the bottom of the **Customize Motion** page.
- 6.
- On the **Motion and Duration** tab, complete the following tasks for the second copy of the picture:
 - Select the **Specify start and end position of motion** check box.
 - Select the **set start position to be the same as the end position of the previous picture** check box.
 - By setting the starting position for the second copy of the picture to be the same size and position as the end position for the previous copy of the picture, you create continuous motion over the picture.
 - To continue creating a pure panning motion, select the **set end position to the same as start position** check box, and then move the position rectangle for the end position to the location where you want the motion for the second picture to end.

Create a Story from a Single Photo

To ensure uninterrupted motion between the first and second pictures, remove any transitions between them. To do so, click the **Transition** tab, clear the **Start current picture using a transition** check box, and then click **Save**.

Create a Story from a Single Photo

1. To set the motion for the third copy of the picture, click the **Next picture** arrow button at the bottom of the **Customize Motion** page.
2. On the **Motion and Duration** tab, complete the following tasks for the third copy of the picture:
3. Select the **Specify start and end position of motion** check box.
4. Select the **Set start position to be the same as the end position of the previous picture** check box.
5. To have the picture motion expand to the entire picture (rather than a specific part of the picture) at the end of your story, double-click the position rectangle for the end position.

Create a Story from a Single Photo

1. To remove any transitions between the second and third pictures, click the **Transition** tab, clear the **Start current picture using a transition** check box, and then click **Save**.
2. You have successfully created a mini story using just one picture! To preview your mini story, click **Preview**.

Power Point and Photo Story

To create a Photo Story of a Power Point you need to make your slide show a series of pictures.

- Go to **file / save as**
- Pull down option to save as **JPEG**.
- Select every slide option
- Now insert your slides into a Photo Story
