Dear Mr. Connor:

The enclosed report details results for the analysis of the bulk sample(s) submitted to Mountain Laboratories on June 7, 2007. Mountain Laboratories participates in a National Voluntary Laboratory Accreditation Program (NVLAP) for Bulk Asbestos Analysis, governed by the National Institute for Standards and Technology (NIST)-NVLAP I.D. #101890-0. Sample results must not be used by the client to claim endorsement by NVLAP nor any agency of the United States government. Sample analysis was performed to determine asbestos type and content using Polarized Light Microscopy, supplemented by Dispersion Staining (PLM/DS) in accordance with the following methodologies:

USEPA Test Methods EPA/600/R-93/116 "Method for the Determination of Asbestos in Bulk Building Materials"

ASTM Draft "Standard Method for Asbestos Containing Materials by Polarized Light Microscopy" (Committee D22.05, January 14, 1988)

This report includes a summary of the analytical results, chain of custody and copies of the analysts report forms used by our analysis. Analytical results are only reflective of the samples, which were tested and presented in this report. Mountain Laboratories limits warranty to proper analysis methods and take no responsibility for sample procurement.

It has been our pleasure providing you with these analytical services. If you have any questions regarding this report, please do not hesitate to call us at (509) 922-1365.

Sincerely,

Karen L. Drader
Laboratory Manager
