Scholar Craft 3/8" Solid Plastic Stack Chair
 Scholar Craft's most popular chair! Solid thermal-set plastic seat and back make up a smooth, hard surface for years of dependable use. 3/8" chairs use nickel plated steel rivets completely through the frame for superior strength and holding power. This chair is manufactured with a proven crossover leg design which in addition to strength, creates a footprint allowing you to make the most of floor space. The special gooseneck design lets you place the chair upside down on a table for easier floor cleaning. Legs are 16 gauge tubular swaged steel with self-leveling glides. Continuous back support tubing is 14 gauge steel. Chairs are available in 4 heights and 7 colors as shown below. *Please order in increments of five.
