May 8- May 14

***** This newsletter, as well as all to follow, will be sent home as well as posted on the school website. Look under Explorer Newsletters.**

1st Grade Math: This upcoming week we will focus on reviewing and reinforcing problem solving with differences, fractions and fractional parts, geometry, and graphing. Please continue to work on homework with your child, as it is additional reinforcement of math skills.

2nd Grade Math: Second grades will be beginning Unit 11. This includes addition and subtraction number stories with dollars and cents, learning about multiplication and division fact families, as well as involving these in number stories.

Expedition: Mr. Peters (Holly Peters' dad) will be joining us on May 15th to share with students his knowledge on irrigation and how water flows. He will also be helping us understand the importance of brochures for sharing information.

Culmination Date Reminder!!! Please mark your calendars for our culmination celebration day on May 30th at 1:30. You will be involved in the presentation, so get your lab coats ready! ☺

Library Books: The year is coming to an end and it is time to turn in all Summit School library books! Mr. Moon goes through a lot of work checking to make sure all library books are inventoried. Please check your child's room for his or her books! If you think your child has turned in all their books and they are bringing home slips of missing books, please contact Mr. Moon. He will help your child to a shelf check for the missing book. Thanks!
