Math

Fourth Grade

- We finished our focus on area and perimeter.
- We will do a short study of symmetry during the week after break. During that week, we will also look at some WASL released items so that students get a preview of the test's format.

Third Grade

- We are working on Unit 9-More multiplication and Division. We have been practicing mental math and working on perfecting our multiplication skills. After break we will be practicing some WASL type problems, so that students will be familiar with the test format.
- Be sure to take a little time during break to memorize your multiplication facts. All the work we do will be easier if you are able to respond quickly to multiplication facts.

Expedition

- Students took a written assessment of our Spokane expedition.
- We will visit the Davenport Hotel on Thursday, April 12.
- Our culminating event will be on the afternoon of April 12. See back for details.

WASL

You should have received an informational letter regarding the WASL at your student's conference. Navigators will be testing on the following dates:

Monday-Thursday, April 16-19

Tuesday-Thursday, April 24-26

It is important that students are at school *on time* for testing. Students arriving once testing has started will be required to wait in the office until testing is over for that day. They will then take that day's test on a make-up day. Please make sure your student is well rested and has a healthy breakfast.

Upcoming Events

- April 2-6—Spring Break!
- April 12—Davenport tour and culminating event.
- April 16-27—WASL testing for 3rd and 4th graders.
